DORMAN®
OE SOLUTIONS™

"More Quality..."

Evaluation » Design & Development » Validation » Continuous Improvement

3-Dimensional Coordinate Measuring
Validates overall design and specifications for proper fit, form, and function.

Benchmarking
Performance, Fit, and Failure modes of Original Parts Checked.

Tensile Testing
Validates and tests cable strength.

Material Hardness Testing
Verifies proper material selection for performance of the product.

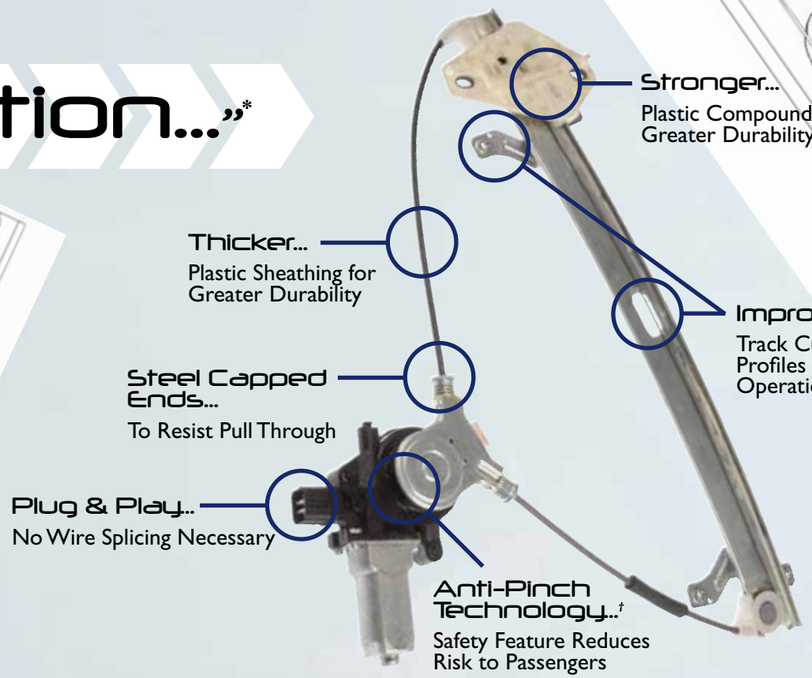
Motor Dyno Testing
Certifies motor performance criteria.

On-Vehicle Testing
Validates trouble free installation, performance, and durability.

Cycle Testing
Validates durability and performance of the regulator and motor over extended cycles.

"More Innovation..."*

- ***Re-Engineered to Improve the Original Design***
- ***Latest Technological Advances in Motors, Materials and Cable Systems Applied to New and Previously Released Applications***



*Specific enhancements vary by application.
†As featured in original motor design.

"More Coverage...

More Opportunities to say "Yes!"
- Market Leading Coverage - Over 1,300 Top Selling SKUs

Exclusive Coverage
- Over 500 Dorman-only SKUs covering 190-million repair opportunities

The RIGHT Coverage
- Dorman's experienced **Window Regulator Team** researches and develops the most failure prone applications
