MOUNTING INSTRUCTIONS

Remove

Place vehicle on a chassis hoist,
lift it and remove wheels.

***The lower control arm must be
supported by suitable means!***

Remove bottom mount.

Remove top fixing nut from support bearing.
Do not remove center nut at this time!

Remove complete strut and
clamp it in an appropriate strut vise.

Using a suitable spring compressor, compress
suspension spring until tension on support bearing is
released.

Release center nut and remove original
mounting parts and coil spring. Please refer
to diagram to identify which parts will be re-
placed with BILSTEIN- supplied components.

Install

Assemble BILSTEIN and/ or original
mounting parts, as well as the new
BILSTEIN spring on the BILSTEIN
strut in reverse sequence of removal.

***Before releasing the spring, care is
to be taken to ensure that the ends
of the spring rest in the cutouts of
the top and bottom spring plates.***

The correct mounting position of the suspension
springs can be determined by the printing on
the springs; install them with the print upright.

Fit assembled BILSTEIN strut to the
vehicle in reverse sequence to removal.
