

THE COMPLETE PACKAGE

Spectra Premium Intercoolers are engineered, developed and validated to ensure it meets the cooling efficiency of OE specifications. Our Intercoolers are designed to minimize pressure drop and maximize heat dissipation in order to achieve maximum engine operating efficiency.

Common Intercooler Failure

- Damage due to frontal collision or road debris
- Turbocharger failure will clog the intercooler with debris and particles
- Damaged or worn out hoses

A leaking or damaged intercooler will lead to inadequate cooling as the air entering the engine will be hotter and less dense. This leads to a loss of power and efficiency, and will result in increased fuel consumption. It may also lead to serious damage of the turbocharger and the engine, and costly repairs.

Spectra Premium Intercoolers

- Manufactured with the highest quality components to ensure product quality and durability
- Designed with high density multi-louvered fins for maximum cooling efficiency
- All units are leak tested to ensure a damage-free unit at installation
